

RESEARCH INCUBATOR

The NEC Society Research Incubator provides a space for the NEC community to engage in research questions and collaborate from inception through implementation and evaluation. Members include physicians, scientists, multidisciplinary professionals, and patient-family advocates affected by NEC.

VISION

Accelerate NEC research, with scientists & clinicians working in partnership with patient-families.

OBJECTIVE

Improve the prevention and treatment of necrotizing enterocolitis (NEC) by bringing together multidisciplinary investigators to conduct novel research as a collective team, integrating the patient-family voice.

BUILDING A WORLD WITHOUT NEC

GOALS:

Foster multi-center collaboration.

Support the design and implementation of research through seed grants.

Engage trainees, new researchers, and other interested stakeholders in NEC research.

Galvanize the research community around the NEC Research Priorities. Learn more [here](#).

INCUBATING RESEARCH THROUGH:

Quarterly Virtual Research Roundtables

NEC Biorepository

NEC Investigator Mentorship Match

Patient-family Project Advisor Match

Discover opportunities for collaboration, engage with patient-families, present and share your work with the NEC community, access and work with NEC Registry patient data, and more!
